

Facility: _____ Department Name: _____

I stand with my peers and for my patients to collectively participate in unified concerted action to move our bargaining priorities; by holding Los Angeles County accountable to negotiate a fair and equitable and just contract.

- A contract that values and takes into consideration our work and demanding conditions of work in this national and severe physician shortage.
- A contract that includes fair and equitable benefits just like management.
- A contract that recognizes our contributions during the pandemic by providing equitable wages standard in the community.
- A contract that values our patients by providing us with the resources we need.
